

# ADDITIVE

FOR LUBRICANTS

## K-612 MARK B

### DESCRIPTION

It is an oil solution of ethylene-propylene copolymer

### RECOMMENDED INPUT

The dosage depends on the type of base oil used

### SCOPE

It is used in the manufacture of oils to increase viscosity and viscosity index

### TYPICAL PARAMETERS

| Parameter  | Limit | Typical |
|--|-------|---------|
| Kinematic viscosity at 100 °C, mm <sup>2</sup> /sec, NLT                               | 1800  | 1900    |
| Colour on colorimeter for visual colour determination of dark oil products, units, NMT | 3,0   | 0,5     |

### PACKAGING

euro drum
